Zinc Alloy Die Casting Machine Components Polishing Anodizing,

Basic Information

- Place of Origin:
- Brand Name:
- Model Number:
- Minimum Order
 Quantity:
- ywy123 1 Perch/Perches

guangdonghuizhou

Price: USD 3.88-32.88 1 Perch/Perches

ywy

- Packaging Details: Carton packaging and blister box
- Delivery Time: 10-15work days
- Payment Terms: L/C D/A D/P T/T Western Union MoneyGram
- Supply Ability: 1000 Perch/Perches 10-15work days

Product Specification

Highlight:	Zinc Alloy Die Casting Machine Components, Polishing Die Casting Machine Components
Pressure:	0-500T
Tolerance:	±0.01mm
Package:	Wooden Case/Pallet
Surface Finish:	Polishing, Anodizing, Plating, Painting, Etc.
Design:	3D/2D Drawing
• Weight:	0.1-50kg
• Size:	Customized
Application:	Automotive, Electronics, Industrial, Etc.

Product Description:

Die Casting Components is a range of precision-engineered products manufactured using advanced die casting technology. These components are made from both magnesium alloy castings and zinc alloy castings, as well as high-pressure die castings and aluminum alloy castings. The components come in a variety of sizes, all of which are customized to meet the specific requirements of the customers. The weight of the components range from 0.1 to 50kg, while the lead time for production is 7 to 15 days. The components can also be customized with additional features like CNC machining and surface treatments. The components through T/T, L/C, PayPal, etc. The components come with a 100% satisfaction guarantee and the customer service team is always available to answer any questions.

Technical Parameters:

Parame ter	Value
Material	Aluminum, Zinc, Magnesium, Copper, Etc.
Process ing	Zinc Alloy Castings, Sand Castings, Sand Castings, Aluminum Castings, CNC Machining, Pressure Casting, Low Pressure Casting, Die Casting.
Pressur e	0-500T
Payme nt	T/T, L/C, PayPal, Etc.
Mold Life	50,000-1,000,000 Shots
Shippin g	By Sea/Air/Express
Design	3D/2D Drawing
Lead Time	7-15 Days
Toleran ce	±0.01mm
Size	Customized

Applications:

Ywy444 Die Casting Components are produced by high-pressure die castings, lost wax castings, zinc alloy castings and sand castings. Our die cast components are perfect for automotive, electronics, industrial applications and more. With our die casting components, your product can achieve a long-lasting, high-quality look. The size of the components can be customized according to your needs. Our die cast components are made from aluminum, zinc, magnesium, copper and other materials. The mold life of our die cast components is between 50,000 to 1,000,000 shots, and we offer multiple shipping options, including by sea, air, or express, to ensure that your product arrives on time and in the best condition. With Ywy444 Die Casting Components, you can rest assured that you are getting the highest quality components with superior performance.

Customization:

Customized Service for Die Casting Components

Brand Name: ywy Model Number: ywy444 Place of Origin: Guangdong, Huizhou Mold Life: 50,000-1,000,000 Shots Tolerance: ±0.01mm Package: Wooden Case/Pallet Weight: 0.1-50kg Lead Time: 7-15 Days Specialized in: Magnesium Alloy Castings, Magnesium Alloy Castings, Aluminum Alloy Castings

Support and Services:

Technical Support and Service for Die Casting Components

We provide our customers with comprehensive technical support and service for Die Casting Components. Design Optimization

Our experts can help our customers to optimize their Die Casting Components designs for cost-efficiency and better performance. We adopt the latest technologies and manufacturing processes to ensure the best quality and cost-efficiency. Validation Tests

We conduct thorough validation tests to ensure that our Die Casting Components meet the industry standards. Our tests include physical tests, chemical tests, and performance tests. Installation and Maintenance

We provide installation and maintenance services for our Die Casting Components. Our technicians are experienced and knowledgeable in handling all types of Die Casting Components. We also provide ongoing after-sales services and maintenance.

FAQ:

Q: What is Die Casting Components?

A: Die Casting Components is a kind of casting process that injects molten metal into a mold cavity under pressure. ywy is a brand name and ywy444 is the model number of our Die Casting Components, which is originated from Guangdong Huizhou.

Q: What materials can be used for Die Casting Components?

A: Die Casting Components can be made of aluminum, zinc, copper and other metal alloys.

Q: What are the advantages of Die Casting Components?

A: The advantages of Die Casting Components are high dimensional accuracy, good surface finish, short production cycle, low cost and wide application.

Q: Does the Die Casting Components require post-processing?

A: The Die Casting Components usually require some post-processing, such as deburring, grinding and polishing.

Q: What industries can the Die Casting Components be applied to?

A: The Die Casting Components can be applied to automotive, electronics, machinery, communication and other industries.
